Kaushik Jayshing Desai

Desaikaushik441@gmail.com 8381035036 linkedin.com/in/kaushik28

Professional Summary

Aspiring IT Infrastructure, Networking and Cybersecurity professional with hands-on experience in network security, vulnerability assessment, system hardening and security monitoring. Proficient in TCP/IP, network traffic analysis, Nmap, Wireshark, Kali Linux and vulnerability assessment tools. Experienced in analyzing network traffic, security events and system vulnerabilities through practical cybersecurity projects and a VAPT internship. Strong willingness to learn networking technologies and build a career in IT Infrastructure, Networking and Security.

Professional Experience

VAPT Analyst Intern, *DCyber.in* 04/2026 – 07/2026
mumbai

- Conducted Vulnerability Assessment and Penetration Testing (VAPT) on web applications and networks.
- Performed reconnaissance, vulnerability scanning, and security testing using industry-standard tools.
- Identified security vulnerabilities such as XSS, SQL Injection, authentication flaws, and misconfigurations.
- Prepared detailed vulnerability reports with risk ratings, proof of concepts (PoCs), and remediation recommendations.
- Assisted in security assessments, report documentation, and client deliverables.
- Collaborated with the cybersecurity team to improve overall security posture and compliance.

Education

Bachelor of Science in Computer Science (BSc CS), *Patkar Varde College* 09/2024 – Present

Higher Secondary School Certificate – Science, *Lokmanya College* 09/2022 – 03/2024

Secondary School Certificate, *N.G. Vartak School, Virar East* 06/2008 – 04/2022

Technical Skills

Security & Networking Tools
- Kali Linux
- Nmap
- Wireshark
- Burp Suite
- Metasploit

Networking Fundamentals
- OSI Model & TCP/IP Model
- Ethernet, MAC Address & ARP
- IPv4 Addressing & Subnetting
- TCP vs UDP
- DHCP & DNS
- Ping & Traceroute

Firewalls

Defensive Security
Log Analysis, Incident Response, SIEM Concepts, Windows Hardening.

Network Infrastructure
- Switches, Routers & Default Gateway
- VLAN Fundamentals
- Basic Routing Concepts
- OSPF Fundamentals
- Network Troubleshooting

Defensive Security
Log Analysis, Incident Response, SIEM Concepts, Windows Hardening

Cybersecurity
- Ethical Hacking & Penetration Testing
- Vulnerability Assessment & Exploit Analysis
- Web Application Security
- OWASP, SQL Injection & XSS
- Firewall & IDS/IPS Basics

Awards & Achievements

1st Place at National Level Shotokan Karate championship
- **14 years of Shotokan Karate training**, competing at State, National, and International levels.
- Won **2 Gold and 2 Silver medals** in State and International Karate competitions.
- Achieved **1st Place at the National-Level Shotokan Karate Championship**, competing against 100+ athletes.
- **4 years of MMA experience** at the State level.
- Demonstrated strong **discipline, teamwork, consistency, and commitment to continuous improvement**.

Languages & Interests

Languages
English, Hindi, Marathi (3 languages)

Interests
- IT Infrastructure & Networking
- Network Security
- Cybersecurity
- Ethical Hacking
- Network Troubleshooting
- Martial Arts

Projects

VulnScanner – Cybersecurity Vulnerability Scanner Platform 04/2026 – 05/2026
- Designed and developed a full-stack cybersecurity vulnerability scanning platform from scratch.
- Integrated Nmap-based port scanning for real-time network reconnaissance and service enumeration.
- Implemented CVE vulnerability detection with live CVSS-based severity scoring.

- Developed a Risk Score Calculator to assess overall security posture and prioritize remediation.
- Built scan history management and exportable security reports for vulnerability tracking.
- Created an admin dashboard for monitoring users, scans, and platform activity.
- Implemented secure authentication using JWT and bcrypt.
- Containerized the application using Docker and deployed through Railway with GitHub CI/CD automation.

Tech Stack: React, Vite, Node.js, Express.js, PostgreSQL, Nmap, JWT, bcrypt, Docker, Railway, GitHub Actions

Cybersecurity Labs & Security Assessment Portfolio, *Wireshark/network analysis higher Hands-on Security Operations, Vulnerability Assessment & SIEM Monitoring* 04/2026 – 05/2026

- Performed System Hardening on Windows and Ubuntu by implementing password policies, firewall configurations, service management, and audit logging.
- Conducted vulnerability assessments using OpenVAS, identifying security weaknesses and analyzing remediation recommendations.
- Analyzed Windows Event Logs to detect failed logins, privileged access events, account lockouts, and system anomalies.
- Deployed and configured Wazuh SIEM, connected Kali Linux endpoints, and investigated security alerts and event monitoring dashboards.
- Captured and analyzed network traffic using Wireshark, investigating HTTP, DNS, TLS communications, and suspicious network behavior.

Skills: Kali Linux, OpenVAS, Wazuh SIEM, Wireshark, Windows Event Viewer, Ubuntu, Windows Security, Log Analysis, Vulnerability Assessment, Network Security

Automated VAPT Platform (VulnScanner), 06/2026

Full-Stack Cybersecurity Automation Platform | Ongoing

- Developing an automated Vulnerability Assessment and Penetration Testing (VAPT) platform to streamline security assessments.
- Implementing URL, Domain, and IP-based security scanning capabilities.
- Building support for batch target uploads and multi-stage security testing workflows.
- Integrating vulnerability identification, risk analysis, and automated report generation.
- Designing dashboards for scan management, vulnerability tracking, and assessment reporting.
- Focused on reducing manual testing effort while maintaining professional security assessment standards.
- Leveraging modern DevSecOps practices including Docker deployment and CI/CD automation.

Tech Stack: React, Node.js, Express, PostgreSQL, Docker, Nmap, GitHub Actions, Railway

NETWORKING LABS, *Cisco Packet Tracer – Networking Fundamentals*

- Created basic LAN topologies and configured PCs, switches, and routers.
- Practiced IPv4 addressing and subnetting.
- Configured and tested connectivity using ping and basic troubleshooting.
- Studied ARP, MAC addresses, default gateway, DHCP, and DNS concepts.
- Practiced VLAN and basic routing concepts.
- Explored OSPF fundamentals in simulated network environments.

Certifications & Courses

Cyber Security – Boston Institute of Analytics (BIA)

Certified Cybersecurity Educator Professional (CCEP) – Red Team Leaders

Ethical Hacking – Boston Institute of Analytics (BIA)

Python for Defensive Security – Red Team Leaders

Log Analysis for Cyber Defense – Red Team Leaders

Networking Training- TCP/IP & OSI Model IP Addressing & Subnetting VLAN & Routing Basics DHCP & DNS Cisco Packet Tracer Labs
